

NEWS FLASH - MAY 2014

In this issue we focus on Optima's Winches:

Optima can offer a variety of winches for industrial and marine use. Although we have a range of standard winch designs - as with our other products - any standard design can be customised as per the customers' requirements.

Included in our Winch and Drive Solutions are:

- Design and Manufacture of Standard Winches
- Design and Manufacture of Customised Winches
- Line Pull: 0.5 Ton to 300 Ton
- Spooling Gear for all Winches
- Winches with Fail Safe Brakes
- Winches with Constant Tension and Rendering Systems
- Winches with and without Free Fall features (Free Wheeling)
- Winches with and without Displacement Shift Controls
- Winches with Band Brake System or Disc Brake System

Contact us today for all your winch or drive system enquiries.

Process Control/Recording/Reporting: The process is controlled from the start by our ISO9001:2008 system which dictates traceability throughout. In conjunction with the customer, the necessary quality control procedure is established and followed.
